

# Subject Index to Volume 20

## A

A6 cells, anuran epithelia, neurohypophysial peptide potencies, R77  
Acetylcholine  
renin release and (turtle), R1103  
sensitivity, ventromedial hypothalamic lesion, R63, R70  
Acid-base balance, chronic hypercapnia, no renal response to (turtle), R1228  
Acidosis, metabolic, interorgan glutamine flow, renal regulation of, R859  
ACTH: see Adrenocorticotropin  
Adenosine monophosphate, cyclic calcium and, control of renin secretion, R531  
cystic fibrosis and, airway epithelial cells, R818  
hepatic, adrenomedullation effects, R552  
ion transport and, gill (flounder), R1064  
Adenosine triphosphate, alkalosis effects, skeletal muscle, R833  
Adipose tissue  
brown: see Brown fat  
cellularity, hemodynamics of obesity, R314  
Adrenal cortex, repeated hemorrhages and, awake state, R1200  
Adrenalectomy  
circadian urinary excretion rhythms in, R441  
lean and obese, blood flow to brown fat in, R851  
metabolic and behavioral effects, obesity and, R923  
Adrenal medulla  
enkephalin secretion, sympathetic control of, after hemorrhage, awake state, R341  
liver glycogenolysis in, high-intensity exercise effects, R552  
responses to hemorrhage, awake state, R1193  
Adrenocorticotropin  
arterial hypertension and, R614  
hypotensive hemorrhage, medullary lesion effects, R106  
plasma, medulla-mediating release, R934  
repeated hemorrhage and, awake state, R1200  
response, corticotropin-releasing factor and hyperosmolality, awake state, R1235  
responses, arterial hypotension (sheep), R18  
Adrenomedullation, metabolic responses and, high-intensity exercise, R552  
Afferent nerves, comparison of efferent nerve activity, R700  
Aging, kidney function, renin angiotensin system in, R450  
Airway  
epithelial cells, cystic fibrosis and, R818  
obstruction, respiratory regulation, infant, R811  
Alanine  
interorgan flow, renal regulation, metabolic acidosis and, R859

transport, intestinal brush-border membrane vesicles (eel), R463  
Albumin, labeled, injection into amniotic cavity (sheep), R781  
Aldosterone  
head-up tilt and vasopressin infusion effects, R735  
hypotension, passive head-up tilt and, R472  
interference with, salt appetite and, R762  
secretion, synthetic atrial natriuretic factor effects, R48  
sodium excretion, during water deprivation, R560  
superpression of, stress-salt hypertension, R181  
Alkalosis, skeletal muscle performance and, exercise, R833  
Alliesthesia, opioid antagonist effects, sucrose preference and, R91  
Alveolar cells, type II, perinatal anatomic development of, R470  
Alveolar wall, composition, postnatal, dexamethasone effects, R218  
Amiloride  
epithelial responses, tongue, R598  
sodium-ammonium exchange, osmoconforming marine invertebrates, R957  
Amino acids  
metabolism, long-term parenteral hyperalimentation and (guinea pig), R388  
muscle, spaceflight effects, R1059  
osmolytes, protein function and, R197  
transport, system A, endotoxic shock effects, soleus muscle, R150  
Ammonia, excretion, sodium absorption and, osmoconforming marine invertebrates, R957  
Ammoniogenesis, glutamine flow, renal regulation of, R859  
Amphetamine, dietary protein and tyrosine, diabetes, behavior and, R371  
Anesthetics, closed ventriculosternal perfusions, cerebrospinal fluid pressure and, R990  
ANF: see Atrial natriuretic factor  
ANP: see Atrial natriuretic peptides  
Angiotensin  
intracranial, drinking and natriuresis, R381  
pressor contributions from, after polyethylene glycol, R769  
sodium appetite and (sheep), R690  
supersensitivity, hypophysectomy effects, R53  
Angiotensin II  
aldosterone secretion mediation, ANF effects, R48  
drinking, after lateral parabrachial lesions, R504  
hypotension, passive head-up tilt and, R472  
interference with, salt appetite and, R762  
peripheral, vasotocin release and, awake state (chicken), R333  
pressor responses and, central sodium chloride injection, awake state (turkey), R258  
systemic, neurosecretory cell activity and, R712  
Anorexia, induced by D-glucosamine, deoxidized, R481  
Antidiuretic hormone: see also Vasopressin  
angiotensin II effects, awake state (chicken), R333  
neurohypophysial peptide potency effects, A6 epithelia, R77  
volume influences on, dehydration and (sheep), R621  
Aorta, pressure-volume characteristics (seal), R174  
Aortic nerves  
depressor, hexokinase activity, forebrain, R274  
respiratory regulation and, infant, R811  
Aortic stenosis: see Stenosis  
Apnea  
regulation, carotid sinus and aortic nerves in, R811  
sleep, hematocrit variation during, infant (seal), R429  
Apomorphine, dietary protein and tyrosine, diabetes, behavior and, R371  
Appendectomy, right atrial, volume-expansion natriuresis and, R310  
Appetite: see Feeding  
Area postrema  
cholecystokinin-induced satiety and, R971  
lesions, vagal function and, R575  
Arginine vasopressin: see Vasopressin  
Arginine vasotocin, A6 epithelia, R77  
Arterial-venous difference, ANF and renal function, immersion, awake state, R1000  
ATP: see Adenosine triphosphate  
Atrial natriuretic factor  
aldosterone secretion and, R48  
atriopeptin, chicken heart extract and (chicken), R543  
release, control of, awake state, R947  
renal function and, immersion, awake state, R1000  
vascular and renal responses to (trout), R639  
Atrial natriuretic peptides  
saline infusion and drinking effects, R1091  
saline loading, awake state, R499  
volume-expansion natriuresis, R310  
Atriopeptin, chicken heart extract and (chicken), R543  
Atriopeptin II, renal nerves and, R187  
Atropine  
cerebral ischemic response and, R295  
heart rate control, ontogeny of (bullfrog), R231  
Autonomic agents, renin release and (turtle), R1103  
Autonomic nervous system, ventromedial hypothalamic lesion, pancreatic adaptation after, R63, R70  
Autoregulation, hemorrhage and naloxone effects, barodenerivation, awake state, R909  
Awake state  
atrial natriuretic factor release, R947

## SUBJECT INDEX TO VOLUME 20

**Awake state (continued)**  
 barodenervation, hemorrhage and naloxone effects, R909  
 baroreflex, increased left ventricular pressure, R23  
 blood volume, continuous determination, R492  
 corticotropin-releasing factor and hyperosmolality, vasopressin response to, R1235  
 enkephalin secretion, adrenal, R341  
 hemorrhage  
     adrenal medullary response to, R1193  
     control (rat, chicken), R846  
 hormonal responses, arterial hypotension (sheep), R18  
 immersion, ANF and renal function during, R1000  
 plasma vasopressin concentration, subformical organ, electrical stimulation effects, R425  
 plasma volume, during water immersion, R582  
 pressor responses, sodium chloride injection, central (turkey), R258  
 repeated hemorrhage, pituitary-adrenal response, R1200  
 saline loading, atrial natriuretic peptide levels during, R499  
 sinoaortic denervation, hemodynamic variability after, R1163  
 vasotocin release, peripheral angiotensin II stimulation of (chicken), R333

**B**

Balloon, intragastric, food intake and body weight relations, R794  
 Barodenervation, hemorrhage and naloxone effects, awake state, R909  
 Behavior  
     baroreflex responses and, cardiac and vasomotor (baboon), R126  
     diabetes, dietary protein and tyrosine effects, R371  
     photoperiod modification, circadian resetting responses (sparrow), R1156  
     taste transduction, epithelial responses of tongue, R598  
 Betaine, protons and osmolytes, protein function and, R197  
 Bethanechol, drinking responses (pig), R157  
 Bilirubin, binding, drug uptake and, brain, R996  
 Biorhythms, regulation (high-arctic bird), R264  
 Bladder: see Urinary bladder  
 Blockade, ganglionic, pressor resistance to vasopressin, R525  
 Blood  
     chemistry, sleep apnea effects, infant (seal), R429  
     oxygen binding, temperature, diving, and alkaline tide (alligator), R901  
     volume: see Volume  
 Blood-brain barrier  
     glial, permeability, hyperosmotic stress and (skate), R1186  
     protein binding, drug uptake and, R996  
 Blood flow  
     adrenal, repeated hemorrhage effects, awake state, R1200  
     brown fat, adrenalectomy and, R851  
     interrelationship, juxtaglomerular cells and hypertension, R643  
     obesity and, R314

renal  
     atriopeptin II and, R187  
     behavior effects (baboon), R126  
     skin, lung volume effects (frog), R941  
     subcutaneous, head-up tilt and vasopressin infusion effects, R735

Blood pressure: see also Pressure  
     after polyethylene glycol, R769  
     central sodium chloride injection and, awake state (turkey), R258  
     central vasopressin system, activators of, R476  
 control, physical equilibrium and calcium role in, R643  
 maintenance, sympathetic nervous system and, R1009

Body  
     composition  
         cold-exposure and overfeeding, neonate, R518  
         testosterone levels and (hamster), R963

fluid: see Fluid  
 mass: see Mass  
 weight: see Weight  
 Bohr effect, carbon dioxide, blood (alligator), R901

Bombesin  
     satiety, hindbrain lesion and, R971  
 thermoregulation and, hypothalamus, R303

Bradycardia  
     during hypotension, passive head-up tilt, R742

hypoxia and sodium cyanide in (long-nose gar), R116

Bradykinin, reticular neurons, coronary artery occlusion responses of, R670

Brain, drug uptake, protein binding and, R996

Bronchiolar epithelium, development, hyperoxia and, neonate, R1045

Brown fat  
     blood flow: see Blood flow  
     diet, thermogenesis and, neonate, R518  
     diet-induced obesity, without hyperphagia, R433

insulin, metabolic efficiency and, R1109, R1118

mitochondria, potassium-hydrogen exchange in (hamster), R787

nerve, glucose effect on, R240  
 norepinephrine turnover, single meal effects, R13

short-photoperiod changes, testosterone levels and (hamster), R963  
 ventromedial hypothalamic stimulation of, sympathetic denervation effects, R1005

Brush-border membrane vesicles, intestinal, glucose and alanine transport in (eel), R463

**C**

Calcium  
     cAMP and, control of renin secretion, R531

cytosolic free, endotoxicosis and sepsis, R984

interrelationship, blood flow, juxtaglomerular cells, and hypertension, R643

Calcium ionophore, cystic fibrosis and, airway epithelial cells, R818

Calmidazolium  
     renin secretion and, R531

*Schistosoma mansoni* and, R1057

Calmodulin  
     renin secretion and, R531

*Schistosoma mansoni* and, R1057

Calories, regulation, adrenalectomy and, R923

cAMP: see Adenosine monophosphate, cyclic

Captopril  
     peripheral resistance, during cardiac tamponade, R916

pressor responses and, central sodium chloride injection, awake state (turkey), R258

salt appetite and, R762

Carbachol, intracranial, drinking and natriuresis, R381

Carbon dioxide  
     content, lung, cutaneous gas exchange and (frog), R941

production, measurement by doubly labeled water method (caribou, reindeer), R143

Cardiac output

behavioral stress effects, R82

hemorrhage and, awake state (rat, chicken), R846

myoglobin effects, oxygen consumption (fish), R1144

obesity effects, R314

Cardiac tamponade, peripheral resistance during, adrenergic and angiotensin roles, R916

Carotid sinus

reflex: see Reflexes

respiratory regulation and, infant, R811

Castration, brown fat changes and (hamster), R963

Catecholamines

adrenal

    repeated hemorrhage and, R1193

    sympathetic control, after hemorrhage, awake state, R341

brain, behavior in diabetes, diet effects, R371

hemorrhage and, barodenervation, awake state, R909

hypoxemia effects, immunoautonomized fetus (lamb), R893

plasma

    adrenomedullation effects, R552

    behavioral stress and, R82

renin release and (turtle), R1103

splanchnic metabolism, hypoxemia and, R887

CCK: see Cholecystokinin

Cecum, uric acid degradation (quail), R59

Central nervous system  
     chemosensitive areas, cerebral ischemic response and, R295

hexokinase activity, hypertension effects, R274

sodium chloride injection, pressor responses to, awake state (turkey), R258

Cerebral ventricles

angiotensin or carbachol, drinking and natriuresis, R381

anteroventral third, osmotically induced drinking and, R823

Cerebrospinal fluid

    elevated osmolality, thermoregulatory heat loss and, R749

production rate and pressure, closed ventriculocisternal perfusion, R990  
 Chloride, secretion, cystic fibrosis and, airway epithelial cells, R818  
**Cholecystokinin**  
 area postrema lesions, vagal function and, R575  
 feeding, exocrine pancreatic secretion and, R97  
 satiety, dorsomedial hindbrain and, R971  
**Cholecystokinin-8**, derivatives, suppression of food intake, R718  
**Circadian phase**, sleep deprivation and light effects, sleep regulation, R1037  
**Circadian rhythms**: *see* Rhythms  
**Circadian variation**, REM sleep oscillator system, mathematical model, R1011  
**Cirrhosis**, pressor resistance to vasopressin, R525  
**Citrate synthase**, short-photoperiod brown fat changes and (hamster), R963  
**Clara cells**, bronchiolar, hyperoxia effects on development, neonate, R1045  
**Clearance**  
 plasma fibronectin, sepsis and, R724  
 urinary, arginine vasopressin, R365  
**Cold**  
 adaptation, immersion (penguin), R456  
 exposure  
 brown fat changes, testosterone levels and (hamster), R963  
 insulin and metabolic efficiency, R1118  
 overfeeding and, brown fat mediation of energy expenditure, neonate, R518  
**Compartmental analysis**  
 vanadium metabolism (sheep), R325  
 zinc metabolism, R398  
**Compliance**, vascular, fetal, nonlabor uterine contractions and (sheep), R409  
**Compound 48/80**, *Schistosoma mansoni* and, R1057  
**Connective tissue**, lung mechanics and, starvation-induced emphysema (hamster), R282  
**Convection**, heat loss, resting and exercise (reindeer), R32  
**Converting enzyme**, inhibition, kidney function and, aging, R450  
**Coronary artery**, occlusion, reticular neuron responses to, R670  
**Corticosteroids**  
 alveolar type II cell development and, R470  
 release, arterial hypertension and, R614  
**Corticosterone**  
 adrenalectomy, obesity and, R923  
 circadian rhythms and, urinary excretion, R441  
**Corticotropin-releasing factor**, vasopressin response to, hyperosmolality and, awake state, R1235  
**Cortisol**  
 response, corticotropin-releasing factor, awake state, R1235  
 responses, arterial hypertension (sheep), R18  
**Coupling**, excitation-contraction, urinary bladder (pig), R978  
**Creatine phosphate**, alkalosis effects, skeletal muscle, R833  
**Current**  
 short-circuit  
 cystic fibrosis, airway epithelial cells, R818

epithelial responses of tongue, R598  
**Cycloheximide**, inhibition of prostaglandin production, muscle, R165  
**Cystic fibrosis**,  $\beta$ -adrenergic response and, airway epithelial cell cultures, R818  
**Cystometrograms**, anesthetic effects, bladder function, R1177  
**Cytochrome oxidase**, insulin, metabolic efficiency and, R1109, R1118

**D**

**Dehydration**  
 cellular and extracellular, lateral parabrachial lesions and, R504  
 endotoxin fever and, R41  
 heat loss responses, cerebrospinal fluid osmolality and, R749  
 natriuresis, R560  
 volume influences, thirst and vasopressin secretion (sheep), R621  
**Denervation**, sympathetic, VMH stimulation of brown fat and, R1005  
**2-Deoxyglucose**, utilization, food intake control and, R840  
**Deoxyribonucleic acid**, muscle, spaceflight effects, R1059  
**Depressor nerve**, aortic, respiratory regulation and, infant, R811  
**Detrusor**, urinary bladder control, female, R225  
**Deuterium**, isotope fractionation, R1137  
**Development**: *see also* Growth  
 heart rate control, ontogeny of (bullfrog), R231  
 respiratory regulation, carotid sinus and aortic nerve role in, R811  
**Dexamethasone**  
 alveolar wall and, postnatal, R218  
 response, corticotropin-releasing factor, awake state, R1235  
**Diabetes**, behavior in, dietary protein and tyrosine effects, R371  
**Diabetes insipidus**, hexokinase activity and, forebrain, R268  
**Diabetes mellitus**, insulin and metabolic efficiency, R1109, R1118  
**Diet**: *see* Feeding  
**Dihydroalprenol**, endotoxicosis and, myocardial failure, R359  
**3,4-Dihydroxyphenylalanine**, diet effects, behavior in diabetes, R371  
**5,7-Dihydroxytryptamine**, hibernation, serotonin role in (hamster), R755  
**Dipsogenic response**,  $\beta$ -adrenergic, food deprivation, R1170  
**Dissynergia**, detrusor-sphincter, urinary bladder voiding cycle, R250  
**Diuresis**  
 ANF and renal function during, awake state, R1000  
 plasma volume, during water immersion, awake state, R582  
 vascular and renal responses, atrial natriuretic factor and heart extracts (trout), R639  
**Diving**: *see also* Immersion  
 hepatocrit variation, sleep apnea effects, infant (seal), R429  
 oxygen binding and, blood (alligator), R901  
 pressure-volume characteristics, aorta (seal), R174

**Dopamine**  
 cardiovascular responses, hemorrhage, fetus (sheep), R417  
 neurons, endogenous enkephalin modulation of, ventral tegmental area, R243  
**Dorsal raphe nucleus**, serotonin, hibernation and (hamster), R755  
**Drinking**  
 angiotensin supersensitivity, hypophysectomy effects, R53  
 atrial peptides and, R1091  
 dehydration natriuresis, R560  
 dipsogenic response, food deprivation and, R1170  
 lateral parabrachial lesions and, R504  
 natriuresis and, volume expansion, angiotensin and carbachol in, R381  
 osmoregulation, high salt intake and, R878  
 osmotically induced, contributions of zona incerta, R823  
 salt appetite, hepatic satiation of, R1095  
 thirst  
 oral hypertonic saline, vasopressin and, R214  
 vasopressin secretion, and volume effects, dehydration (sheep), R621  
 water, gastric secretagogues and (pig), R157

**E**

**Eating**: *see* Feeding  
**Efferent nerves**, comparison of afferent nerve activity, R700  
**Elastance**, maximum, left ventricular dimension relation to, R627  
**Electroencephalography**, sleep regulation, R1037  
**Electrolytes**  
 balance  
 continuous determination, awake state, R492  
 endocrine mechanisms regulating, R560  
**Electrophysiology**, glucose effects, efferent discharges of brown adipose tissue nerves, R240  
**Emphysema**, starvation-induced, lung mechanics and connective tissue in (hamster), R282  
**Endothelial cells**, alveolar wall, dexamethasone effects, R218  
**Endotoxemia**, calcium homeostasis and, liver, R984  
**Endotoxicosis**  
 $\beta$ -adrenergic receptors during, myocardial failure, R359  
 free cytosolic calcium, glycogen phosphorylase and, R984  
**Endotoxic shock**: *see* Shock  
**Endotoxin**  
 amino acid transport and, system A, soleus muscle, R150  
 enhancement of slow-wave sleep, R591  
**Endurance**: *see* Exercise  
**Energy**  
 expenditure  
 brown fat mediation of, neonates, R518  
 doubly labeled water method, R1137  
 metabolic sources, flight (hummingbird), R537  
 metabolism, doubly labeled water validation

**Energy (continued)**  
 tion, ruminant (caribou, reindeer), R143  
**Enkephalin**  
 adrenal secretion, sympathetic control, after hemorrhage, awake state, R341  
 endogenous, modulation of dopamine neurons, ventral tegmental area, R243  
**Enkephalinase**, dopamine neurons and, ventral tegmental area, R243  
**Environment**: *see also Temperature*, and the specific environmental condition, reproduction and (hamster), R663  
**Enzymes**: *see also specific enzyme sources of energy*, flight (hummingbird), R537  
**Epinephrine**  
 atrial natriuretic factor effects, vascular and renal responses (trout), R639  
 cardiovascular responses, hemorrhage, fetus (sheep), R417  
 clearance, hypoxemia and, R887  
 feeding suppression and, liver denervation, R349  
 ion transport and, gill (flounder), R1064  
 liver glycogenolysis and, exercise effects, R1151  
 passive head-up tilt and, R742  
 secretion, repeated hemorrhage and, awake state, R1193  
**Epithelial cells**, airway, cystic fibrosis effects, R818  
**Equilibrium**, physical, blood pressure control and, R643  
**Erythrocytes**, albumin and, injection into amniotic cavity (sheep), R781  
**Estradiol**, environmental stimuli effects (hamster), R663  
**Evaporation**, heat loss, resting and exercise (reindeer), R32  
**Exercise**  
 alkalosis and, skeletal muscle performance, R833  
 conditioning, avoidance, stress-salt hypertension and, R181  
 endurance, locomotion without lungs (salamander), R775  
 heart rate regulation, ontogeny of (bullfrog), R231  
 high-intensity, metabolic responses to, adrenomedullation and, R552  
 liver glycogenolysis during, adrenomedullation and, R1151  
 rest and, partition of heat loss (reindeer), F32  
 running, reduced endurance, gluconeogenesis inhibition, R137  
 treadmill, locomotion, without lungs (salamander), R775

**F**

**Fallopian tubes**, menstrual cycle and, sensitivity to prostaglandins, R1126  
**Fasting**  
 emphysema induced by, lung mechanics and connective tissue in (hamster), R282  
 phase-specific, during estrous cycle, reproduction and (hamster), R663  
**Fatty acids**, oxidation, food intake and, R840  
**Febrile response**: *see Fever*

**SUBJECT INDEX TO VOLUME 20**

**Feedback**, negative, urinary bladder control, female, R225  
**Feeding**  
 anorexia, induced by D-glucosamine, R481  
 appetite regulation, CCK effects, R97  
 biorhythms (high-arctic bird), R264  
 body weight and, intragastric balloon effects, R794  
 control, fatty acid oxidation and glucose utilization in, R840  
 diet, epithelial responses of tongue, R598  
 diet and thermogenesis, brown fat and, neonates, R518  
 diet-induced obesity, without hyperphagia, R433  
 during estrous cycle, reproduction and (hamster), R663  
 eating, pharmacology of, R840  
 food deprivation,  $\beta$ -adrenergic dipsogenic response in, R1170  
 glucagon and epinephrine suppression of, liver denervation and, R349  
 hepatic portal glucose infusion effects, R192  
 high-fat diet, behavior in diabetes and, R371  
 high-protein diet, behavior in diabetes and, R371  
 high-sodium meal, atrial natriuretic factor release and, R947  
 insulin, metabolic efficiency and, R1118  
 insulin-induced hypoglycemia, gastric emptying of glucose, R609  
 low-sodium diet, aldosterone secretion, ANF effects, R48  
 obesity, hypothalamic, R1221  
 overingestion, visceral nerve function and, R575  
 pancreatic secretion and, CCK-8 effects, R97  
 single meal, norepinephrine turnover, brown fat, R13  
 sodium-chloride depletion, polydipsia induced by, neuroendocrine factors in, R1071  
 suppression of food intake, cholecystokinin-8 and, R718  
**Fetus**: *see also Pregnancy*  
 alveolar type II cell development and, R470  
 amniotic fluid, labeled albumin and erythrocytes injected into (sheep), R781  
 cardiovascular and endocrine responses, prolonged hemorrhage (sheep), R417  
 cardiovascular responses, nonlabor uterine contractions (sheep), R409  
 immunosympathectomized, hypoxemia effects (lamb), R893  
**Fever**  
 dehydration and, endogenous pyrogen production, R41  
 endotoxin, dehydration and, R41  
 endotoxin and lipid A, slow-wave sleep, R591  
 Fibroblasts, alveolar wall, dexamethasone effects, R218  
 Fibronectin, plasma, distribution, sepsis and, R724  
 Filtration, glomerular, atriopeptin II and, R187  
 Flight energetics, metabolic sources of energy (hummingbird), R537  
 Flow, urethral, urinary voiding cycle, R250

**Fluid**  
 amniotic  
 labeled albumin and erythrocytes injected into (sheep), R781  
 pressure, nonlabor uterine contractions and (sheep), R409  
 balance, endocrine mechanisms regulating, R560  
 body balance, after lateral parabrachial lesions, R504  
 cerebrospinal: *see Cerebrospinal fluid*  
 intake, continuous determination, awake state, R492  
**Follicle-stimulating hormone**, environmental stimuli effects (hamster), R663

**Forebrain**  
 central vasopressin system, activators of, R476  
 hexokinase activity  
 hypertension effects, R274  
 osmotic stress and, R268  
**Forskolin**, renin secretion and, R531  
**Fructose**, hypoglycemia, gastric emptying of glucose, R609  
**Furosemide**, salt appetite and, R762

**G**

**Gas**, exchange, cutaneous, lung volume effects (frog), R941  
**Gastric distension**  
 CCK-8 effects, R97  
 food intake, body weight and, intragastric balloon effects, R794  
**Gastric emptying**, glucose loads, insulin-induced hypoglycemia and, R609  
**Gastric secretion**, drinking response and (pig), R157  
**Glucagon**  
 alveolar type II cell development and, R470  
 feeding suppression and, liver denervation, R349  
**Gluconeogenesis**, inhibition, reduced running endurance in, R137  
**D-Glucosamine**, deoxidized, anorexia induced by, R481  
**Glucose**  
 deoxidized, anorexia induced by, R481  
 efferent discharges and, brown adipose tissue nerve, R240  
 load, gastric emptying of, R609  
 metabolism, hypoxemia and, R887  
 transport, intestinal brush-border membrane vesicles (eel), R463  
 utilization  
 foot intake and, R840  
 reduced running endurance and, R137  
**Glutamate**, interorgan flow, renal regulation, metabolic acidosis and, R859  
**L-Glutamate**, hypothalamic input, medulla, R788  
**Glutamine**, interorgan flow, renal regulation of, metabolic acidosis, R859  
**Glycogen**, alveolar type II cell development and, R470  
**Glycogenolysis**  
 exercise, skeletal muscle performance and, R833  
 feeding suppression, liver denervation and, R349  
 liver  
 adrenomedullation and, exercise effects, R552  
 during exercise, R1151

Glycogen phosphorylase, endotoxicosis and sepsis, R984

Growth: *see also* Development lung, starvation-induced emphysema and (hamster), R282

Growth factor, nerve, hypoxemia effects, fetus (lamb), R893

Gustatory response aversion, hindbrain lesion and, R971 tongue, epithelial responses of, R598

**H****Heart**

mechanical stimuli, reticular cell responses to, R680

oxygen consumption, function of myoglobin (fish), R1144

pain, reticular neurons, coronary artery occlusions responses to, R670

Heart extract, atrial natriuretic factor and, vascular and renal responses (trout), R639

**Heart rate**

ACTH response to hypotension hemorrhage, medullary lesion, R106

fetal, nonlabor uterine contractions and (sheep), R409

left ventricular pressure effects, awake state, R23

prolonged hemorrhage and, fetus (sheep), R417

regulation, ontogeny of (bulldog), R231 renin and aldosterone suppression, stress-salt hypertension, R181

Heart ventricles, fibrillation, mechanical stimulation and, R680

Heart ventricles, left dimension, maximum elastance and fiber mechanics, R627 increased pressure, baroreflex and, awake state, R23

**Heat****loss**

resting and exercise (reindeer), R32 thermoregulatory, elevated cerebrospinal fluid osmolality and, R749

Hematocrit, variation, sleep apnea effects, infant (seal), R429

**Hemoglobin**

body wall, transport, R1 oxygen binding (alligator), R901

**Hemorrhage** adrenal medullary response to, awake state, R1193 cardiovascular responses to, awake state, R909

enkephalin secretion after, adrenal, awake state, R341

hemodynamics of, awake state (rat, chicken), R846

prolonged, cardiovascular and endocrine responses, fetal (sheep), R417 repeated, pituitary-adrenal response to, awake state, R1200

Hepatic vein, glucose infusion effects, feeding and, R192

Hepatocytes, calcium homeostasis, endotoxemia and, R984

Hexamethonium, cerebral ischemic response and, R295

**Hexokinase****activity**

forebrain, hypertension effects, R274

osmotic stress and, forebrain, R268

Hexose, efferent discharges and, brown adipose tissue nerve, R240

Hibernation, serotonin role in (hamster), R755

**Hindbrain**

central vasopressin system, activators of, R476

dorsomedial, cholecystokinin-induced satiety and, R971

Hippocampus, commissure, electrical stimulation, vasopressin concentration and, awake state, R425

Histamine, drinking response to (pig), R157

Hormonal inhibition, ion transport, gill (flounder), R1064

Hormonal responses, arterial hypotension (sheep), R18

Hydrogen isotope, fractionation, doubly labeled water method, R1137

Hydromineral balance, cecal (quail), R59

Hyperalimentation, parenteral, growth and hepatic composition after (guinea pig), R388

Hypercapnia, renal response, ionic compensation with (turtle), R1228

Hyperglycemia, glucagon and epinephrine effects, feeding suppression, R349

Hyperinsulinemia, ventromedial hypothalamic obesity, pancreatic adaptation in, R70

Hyperosmolality, cerebrospinal fluid, thermoregulation and, R749

Hyperoxia, development and, bronchiolar epithelium, neonate, R1045

Hyperphagia, obesity without, diet-induced, R433

**Hypertension**

arterial, cardiac receptors, vasopressin, and corticosteroid release, R614

borderline, behavioral stress effects, R82 DOCA-sodium chloride, renal function and, R289 hexokinase activity in, forebrain, R274 juxtaglomerular cells, blood flow interrelationship, R643 stress-salt, plasma renin and aldosterone in, R181

Hypertrophy, left ventricular, maximum elastance relation to, R627

Hypervolemia, atrial natriuretic factor effects (trout), R639

Hypoglycemia, insulin-induced, gastric emptying of glucose loads, R609

Hypophysectomy, dipsogenic stimuli, R53

Hypotension arterial, hormonal responses in (sheep), R18

bradycardia during, passive head-up tilt, R742

**Hypothalamus**

lateral, input to medulla, R798 neuronal activity in, D-glucosamine, R481

paraventricular nucleus, hexokinase activity, hypertension effects, R274

ventromedial, stimulation, brown fat, sympathetic denervation, R1005

Hypothermia, bombesin effects, thermoregulation, R303

**Hypovolemia**

passive head-up tilt and, R742

volume influences, dehydration and (sheep), R621

**Hypoxemia**

plasma catecholamines and, immuno-sympathectomized fetus (lamb), R893

splanchnic function, hepatic, R887

**Hypoxia** chemoreflexive response to (longnose gar), R116

comparative facilitated oxygen transport, R1

heart rate regulation, ontogeny of (bulldog), R231

liver, splanchnic function in, R887

myoglobin function, heart (fish), R1144

**I****Immersion:** *see also* Diving

ANF and renal function during, awake state, R1000

cold-water, thermal and metabolic adaptation (penguin), R456

plasma volume during, awake state, R582

Immunosympathectomy, fetal, hypoxemia effects (lamb), R893

Indomethacin, menstrual cycle, fallopian tube and, R1126

Infant, respiratory regulation, carotid sinus and aortic nerve role in, R811

Insulation, fur, rest and exercise, partition of heat loss (reindeer), R32

**Insulin**

diet-induced obesity, without hyperphagia, R433

metabolic efficiency and, R118, R1109

obesity and, hypothalamic, R1221

secretion, glucose-induced, ventromedial hypothalamic lesion, R63

Intestines, brush-border membrane vesicles, glucose and alanine transport in (eel), R463

Ions, transport, hormonal inhibition of, gill (flounder), R1064

Ischemia, cerebral, central chemosensors and, R295

**Isoproterenol**

dipsogenic response, food deprivation and, R1170

drinking, after lateral parabrachial lesions, R504

hypophysectomy effects, dipsogenic

stimuli, R53

renin release and (turkey), R1103

Isotopes, amniotic fluid, recirculation of (sheep), R781

**J**

Juxtaglomerular cells, hypertension and, blood flow interrelationship, R643

**K****Kidney****function**

atrial natriuretic factor and, immersion, awake state, R1000

DOCA-sodium chloride hypertension, R289

renin-angiotensin system and, aging, R450

glutamine flow regulation, metabolic acidosis, R859

hemodynamics, atriopeptin and (chicken), R543

## SUBJECT INDEX TO VOLUME 20

**Kidney (continued)**  
 responses, atrial natriuretic factor (trout), R639  
 response to hypercapnia, ionic compensation with (turtle), R1228  
**Kidney cells, neurohypophysial peptide potencies**, R77

**L**

**Lactate**  
 production, locomotion without lungs (salamander), R775  
 release, alkalosis effects, skeletal muscle, R833  
**Leukocytes**, dehydration, fever and, R41  
**Light-dark cycle**, sleep regulation and, R1037  
**Lipid A**, enhancement of slow-wave sleep, R591  
**Lipids**, metabolism, long-term parenteral hyperalimentation and (guinea pig), R388  
**Lipogenesis**, VMH stimulation, sympathetic denervation effects, R1005  
**Lipopolyaccharide**, endotoxin and, slow-wave sleep, R591  
**Lipoprotein lipase**, insulin, metabolic efficiency and, R1109, R1118  
**Liver**  
 calcium homeostasis, endotoxemia, R984  
 denervated, glucagon and epinephrine effects on feeding, R349  
 glycogenolysis, during exercise, R1151  
 growth and composition, parenteral hyperalimentation effects (guinea pig), R388  
 portal glucose infusion, feeding and, R192  
 satiation of salt appetite, R1095  
 splanchnic function, hypoxemia and, R887  
**Liver cells**: *see Hepatocytes*  
**Locomotion**, without lungs (salamander), R775  
**Lungs**  
 development, dexamethasone effects, R218  
 locomotion without (salamander), R775  
 mechanics, connective tissue levels and, starvation-induced emphysema (hamster), R282  
 volume: *see Volume*  
**Luteinizing hormone**, environmental stimuli effects (hamster), R663

**M**

**Mass**, body, biorhythms (high-arctic bird), R264  
**Meals**: *see Feeding*  
**Medulla**, ventrolateral, hypothalamic input to, R798  
**Melatonin**, exogenous, olfactory bulbectomy and (hamster), R1208  
**Menstrual cycle**, fallopian tube and, sensitivity to prostaglandins, R1126  
**3-Mercaptopicolinic acid**, gluconeogenesis, reduced running endurance, R137  
**Mesolimbic**, dopamine neurons and, ventral tegmental area, R243  
**Metabolic rate**  
 doubly labeled water validation, ruminant (caribou, reindeer), R143  
 thermoregulation (hamster), R320  
**Metabolic regulation**  
 hexokinase activity, osmotic stress and, forebrain, R268

protons and osmolytes, protein function and, R197  
**Metals**, trace, kinetics of zinc metabolism, R398  
**Metamorphosis**, heart rate control and, ontogeny (bullfrog), R231  
**Methylamines**, internal milieu and, protein function, R197  
**Methyl palmitoate**, food intake control and, R840  
**Microneurography**, ongoing baroreflex activity, R1086  
**Microspheres**, radiolabeled, hemodynamics of obesity, R314  
**Micturition**  
 anesthetics and, model, R1177  
 urinary, anesthesia and, R250  
**Models**  
 bladder function, anesthetic effects, R1177  
 left ventricular, dimension, R627  
 mathematical  
   drug uptake, brain, R996  
   recirculation of amniotic fluid isotopes (sheep), R781  
   REM sleep oscillator system, R1011  
   mutual interaction, REM-NREM cycle, R1030, R1033  
 smooth muscle contractility, urinary bladder (pig), R978  
 vanadium metabolism, whole-body (sheep), R325  
**Muscle**  
 glycogen, adrenomedullation effects, R552  
 metabolic sources of energy, flight (hummingbird), R537  
 prostaglandin production, inhibition by cycloheximide, R165  
 protein, spaceflight effects, R1059  
 striated, oxygen transport, R1  
**Muscle, skeletal**  
 micturition, urinary voiding cycle, R250  
 performance, exercise and alkalosis effects, R833  
**Muscle, smooth**  
 prostaglandins actions, oviduct, R1126  
 urinary bladder, contractility, model (pig), R978  
**Myocardium**  
 failure, endotoxicosis, R359  
 sodium-calcium exchange, endotoxic shock effects, R1078  
**Myoglobin**  
 oxygen consumption and, heart (fish), R1144  
 oxygen transport, R1

**N**

**Naloxone**, cardiovascular responses to, awake state, R909  
**Naltrexone**, sucrose preference and, R91  
**Natriuresis**  
 ANF and renal function, awake state, R1000  
 dehydration, R560  
 drinking and, volume expansion, angiotensin and carbachol in, R381  
 volume-expansion, atrial natriuretic peptide role in, R310  
**Nephrectomy**, bilateral, aldosterone secretion, ANF effects, R48  
**Nerve**: *see also specific nerve*  
 activity, averaging of, comparison of methods, R700

**Neurohypophysial peptides**, potency, anterior epithelia, R77  
**Neurohypophysis**  
 increased hexokinase activity, osmotic stress and, R268  
 vasotocin release, angiotensin II effects, awake state (chicken), R333  
**Neurons**  
 medullary sympathoexcitatory, hypothalamic glutamatergic input to, R798  
 neurohypophysial, activity, systemic angiotensin effects, R712  
 reticular, coronary artery occlusion responses to, R670  
 supraoptic neurosecretory, norepinephrine effects, R569  
**Neurosecretory cells**, activity, systemic angiotensin effects, R712  
**Neurotransmitter**, islet, temporal evolution after ventromedial hypothalamic lesion, R63, R70  
**Nitrogen**, recycling, cecum (quail), R59  
**Nitrous oxide**, closed ventriculocisternal perfusions, cerebrospinal fluid pressure and, R990  
**Norepinephrine**  
 cardiovascular responses, hemorrhage, fetus (sheep), R417  
 clearance, hypoxemia and, R887  
 depolarization, supraoptic neurosecretory neurons, R569  
 diet-induced obesity, without hyperphagia, R433  
 insulin, metabolic efficiency and, R1118  
 passive head-up tilt and, R742  
 secretion, repeated hemorrhage and, awake state, R1193  
 sensitivity, ventromedial hypothalamic lesion, R63, R70  
 turnover, single meal effects, brown fat, R13  
**Nucleic acids**, muscle, spaceflight effects, R1059

**O**

**Obesity**  
 adipose tissue cellularity and, R314  
 adenectomy and  
   blood flow to brown fat, R851  
   metabolic and behavioral effects, R923  
 biorhythms and (high-arctic bird), R264  
 diet and thermogenesis, brown fat mediation, neonate, R518  
 diet-induced, metabolic features, without hyperphagia, R433  
 hypothalamic, ventromedial and paraventricular lesions, R1221  
 insulin and metabolic efficiency, R1109  
 intragastric balloon and, R794  
 ventromedial hypothalamic, evolution of pancreatic adaptation, R63, R70  
**Olfactory bulbectomy**, exogenous melatonin and (hamster), R1208  
**Opioid antagonist**, sucrose preference and, R91  
**Osmolality**  
 continuous determination, awake state, R492  
 plasma, atrial peptides and, R1091  
 urine, clearance of arginine vasopressin, R365  
**Osmolytes**, protons and, fitness for protein function and, R197  
**Osmoregulation**, high salt intake and,

drinking and vasopressin effects, R878  
 Oviduct, prostaglandins and menstrual cycle, R1126  
 Ovulation, environment and (hamster), R663  
**Oxygen**  
 binding, blood (alligator), R901  
 consumption  
     locomotion without lungs (salamander), R775  
     myoglobin in, heart (fish), R1144  
     obesity without hyperphagia, R433  
     content, lung, cutaneous gas exchange and (frog), R941  
     isotope fractionation, doubly labeled water method, R1137  
     transport, R1  
 uptake, alkalosis effects, skeletal muscle, R833  
**Oxytocin**  
 neurohypophysial neurons, angiotensin effects, R712  
 oral hypertonic saline and, R214

**P**

Pancreas, adaptation, ventromedial hypothalamic lesion and, R63, R70  
 Pancreatic islets, adaptation, ventromedial hypothalamic lesion, R63  
 Panting, response, cerebrospinal fluid osmolarity inhibition of, R749  
 Parabrachial nucleus, lateral, lesions, drinking after, R504  
 Paraquat, hindbrain lesion, satiety and, R971  
 Parasympathetic nervous system, ventromedial hypothalamic lesion, pancreatic adaptation after, R63, R70  
 Paraventricular lesions, hypothalamic obesity and, R1221  
 Paraventricular nucleus, spinal vasopressin, vasomotor functions and, R510  
 Pentagastrin, drinking response to (pig), R157  
 Peptides: *see also* Polypeptides  
     atrial natriuretic: *see* Atrial natriuretic peptides  
     neurohypophysial, potency, anuran epithelia, R77  
     opioidlike, adrenal secretion, awake state, R341  
     opioid, barodenerivation and, awake state, R909  
 Permeability  
     brain, drug uptake, protein binding and, R996  
     glial blood-brain barrier, hyperosmotic stress and (skate), R1186  
 pH, protein function and, R197  
 Phase-response relations  
     circadian resetting, photoperiod modification of (sparrow), R1156  
     REM sleep oscillator system, mathematical model, R1011  
     urinary excretion, circadian rhythms in, R441  
 Phenoxbenzamine, peripheral resistance, during cardiac tamponade, R916  
 Phentolamine, pressor responses and, central sodium chloride injection, awake state (turkey), R258  
 Phosphodiesterase, calmodulin stimulation of, *Schistosoma mansoni*, R1051  
 Phospholipase A<sub>2</sub>, endotoxic shock, sodium-calcium exchange in, R1078

Phospholipids, proteolysis and, denervated muscle, R165  
 Photoperiod  
     biorythm regulation (high-arctic bird), R264  
     modification, circadian resetting responses (sparrow), R1156  
     olfactory bulbectomy, melatonin and (hamster), R1208  
 Phrenic nerve, ischemic response, cerebral, R295  
 Pineal gland, olfactory bulbectomy, melatonin and (hamster), R1208  
 Pituitary gland, anterior, hypophysectomy, stimulated drinking and, R53  
**Plasma**  
     clearance: *see* Clearance  
     volume: *see* Volume  
 Polydipsia, dietary sodium-chloride-induced, neuroendocrine factors in, R1071  
 Polyethylene glycol, blood pressure after, R769  
 Polymyxin B, slow-wave sleep and, R591  
 Polypeptides: *see also* Peptides  
     pancreatic, passive head-up tilt and, R742  
**Posture**  
     head-up tilt  
         bradycardia during hypotension, R742  
         cardiovascular and endocrine responses to, R735  
 Potassium  
     depletion, pressor resistance to vasopressin, R525  
     excretion, renal, atriopeptin II and, R187  
 Potassium-hydrogen exchange, volume homeostasis and, brown adipose tissue mitochondria (hamster), R787  
 Pregnancy: *see also* Fetus  
     amniotic fluid, albumin and erythrocytes injected into (sheep), R781  
 Pressor agents, centrally acting, pathway for, R476  
 Pressor responses, sodium chloride injection and, central, awake state (turkey), R258  
 Pressure: *see also* Blood pressure  
     aortic, distensibility and (seal), R174  
     arterial  
         ACTH response to hypotension hemorrhage, medullary lesion effects, R106  
         atriopeptin and (chicken), R543  
         cerebral ischemic response, R295  
         head-up tilt and vasopressin infusion effects, R735  
         linear increases in heart period, R1086  
         prolonged hemorrhage and, fetus (sheep), R417  
         stress-salt hypertension, R181  
     interstitial fluid, immersion and, awake state, R582  
     intracranial, closed ventriculocisternal perfusions, R990  
     left ventricular, baroreflex and, awake state, R23  
     mean arterial, hemorrhage and, awake state (rat, chicken), R846  
     vascular, fetal, nonlabor uterine contractions and (sheep), R409  
 Pressure-volume relations  
     aorta (seal), R174  
     connective tissue and, starvation-induced emphysema (hamster), R282  
 Progesterone, environmental stimuli effects (hamster), R663  
 Prolactin, cardiovascular responses, hemorrhage, fetus (sheep), R417  
 Prolyl hydroxylase, oxygen transport, R1  
 Propranolol  
     heart rate control, ontogeny of (bullfrog), R231  
     peripheral resistance, during cardiac tamponade, R916  
     pressor responses and, central sodium chloride injection, awake state (turkey), R258  
     renin release and (turkey), R1103  
 Prostaglandin E<sub>2</sub>  
     dehydration, fever and, R41  
     proteolysis and, denervated muscle, R165  
**Prostaglandins**  
     soline loading, natriuretic hormone levels during, awake state, R499  
     sensitivity to, fallopian tube and menstrual cycle, R1126  
**Protein**  
     binding, drug uptake and, brain, R996  
     dietary, behavior and, diabetes, R371  
     function, internal milieu for, protons and osmolytes in, R197  
     muscle, spaceflight effects, R1059  
     plasma, angiotensin and carbachol, volume expansion, R381  
 Proteolysis, phospholipid and prostaglandin effects, denervated muscle, R165  
 Protons, osmolytes and, fitness for protein function and, R197  
 Pyrogen, endogenous, dehydration and endotoxic fever, R41

**R**

Radiation, heat loss, resting and exercise (reindeer), R32  
 Receptors  
     β-adrenergic  
         diisogenic response, food deprivation and, R1170  
         myocardial, endotoxicosis and, R359  
     baroreceptors  
         activity, pressor resistance to vasopressin, R525  
         aortic, denervation, hexokinase activity and, forebrain, R274  
         increased left ventricular pressure effects, awake state, R23  
         ontogeny of heart rate control (bullfrog), R231  
         respiratory regulation and, infant, R811  
     cardiac, arterial hypertension and, R614  
     chemoreceptors  
         peripheral, hypoxia and, R116  
         respiratory regulation and, infant, R811  
     opioid, barodenerivation and, awake state, R909  
     osmoreceptors  
         oral hypertonic saline and vasopressin, R214  
         zona incerta and, R823  
     sodium and osmo-, activators of central vasopressin system, R476  
 Red blood cells: *see* Erythrocytes  
 Reflexes  
     baroreflex  
         arterial pressure and, R1086  
         increased left ventricular pressure effects, awake state, R23  
         vasomotor responses, behavior effects (baboon), R126

## SUBJECT INDEX TO VOLUME 20

**Reflexes (continued)**  
 cardiac, passive head-up tilt and, R472  
 carotid sinus, behavior effects (baboon), R126  
 micturition, urinary bladder control, female, R225  
 Rehydration, blood volume determination, awake state, R492  
**Renal nerve**  
 activity, environmental stress in hypertension and, R289  
 atriopeptin II and, R187  
**Renin**  
 plasma, stress-salt hypertension, R181  
 plasma activity  
   aldosterone secretion, ANF effects, R48  
   hypophysectomy effects, R53  
 plasma concentration, kidney function and, aging, R450  
 release, autonomic agent effects (turtle), R1103  
 responses, arterial hypotension (sheep), R18  
 secretion, control by calcium and cAMP, R531  
**Renin-angiotensin system**  
 dehydration natriuresis, R560  
 kidney function and, aging, R450  
 peripheral resistance, during cardiac tamponade, R916  
 saline loading, natriuretic hormone levels during, awake state, R499  
 vasotocin release and, awake state (chicken), R333  
**Reproduction**, environmental stimuli and (hamster), R663  
**Resistance**  
 peripheral, cardiac tamponade during, R916  
 vascular  
   behavioral stress effects, R82  
   regional, sinoaortic denervation and, awake state, R1163  
**Respiration**  
 carbon dioxide, ionic compensation with no renal response (turtle), R1228  
 skin, lung volume effects (frog), R941  
 Respiratory pattern, hematocrit variation, sleep apnea and, infant (seal), R429  
 Respiratory regulation, carotid sinus, aortic nerves and, infant, R811  
 Reticular cells, response to mechanical stimuli, heart, R680  
**Rhythms**  
 circadian  
   photoperiod modification (sparrow), R1156  
   shift work schedules and, R636  
   sleep regulation and, R1037  
   urinary, adrenalectomy and, R441  
 diurnal, hypothalamic obesity and, R1221  
 feeding (high-arctic bird), R264  
 olfactory bulbectomy, melatonin and (hamster), R1208  
**Ribonucleic acid**, muscle, spaceflight effects, R1059  
**Running: see Exercise**

**S**

Saline  
 hypertonic, vasopressin responses, awake state, R1235  
 hypertonic infusion, atrial peptides and, R1091

loading, atrial natriuretic peptide levels during, awake state, R499  
 oral hypertonic, transient fall in vasoressin and, R214

**Salt**  
 appetite  
   angiotensin II and aldosterone in suppression, R762  
   satiation of, hepatic, R1095  
 high intake, osmoregulation and, R878  
*Schistosoma mansoni*, calmodulin effects, R1057  
**Secretagogues**, gastric, water drinking induced by (pig), R157

**Sepsis**  
 free cytosolic calcium, glycogen phosphorylase and, R984  
 plasma fibronectin distribution, R724

**Serotonin**, hibernation and (hamster), R755

**Sex differences**, urinary bladder control, female, R225

**Shock**  
 circulatory,  $\beta$ -adrenergic receptors during, R359  
 endotoxic  
   amino acid transport and, system A, soleus muscle, R150  
   cardiac sodium-calcium exchange in, R1078

**Sinoaortic denervation**, hemodynamic variability after, awake state, R1163

**Sleep**  
 regulation, deprivation, light, and circadian phase effects, R1037  
 REM, limit cycle mathematical model, R1011  
 REM-NREM cycle, mutual interaction model, R1030, R1033  
 slow-wave, enhancement by endotoxin and lipid A, R591

**Sleep-wake cycle**, circadian principles and, R636

**Sodium**  
 absorption, ammonia excretion and, osmoconforming marine invertebrates, R957  
 appetite, angiotensin and (sheep), R690  
 depletion  
   pressor resistance to vasopressin, R525  
   salt appetite and, angiotensin II and aldosterone in, R762

excretion  
   atrial natriuretic peptide levels during, awake state, R499  
   during water deprivation, R560  
   renal, atriopeptin II and, R187  
   urinary, atrial natriuretic peptide role in, R310

hypertension, plasma renin and aldosterone suppression in, R181  
 secretion, osmoregulation during high salt intake and, R878

**Sodium-ammonium exchange**, osmoconforming marine invertebrates, R957

**Sodium bicarbonate**, appetite, angiotensin and (sheep), R690

**Sodium-calcium exchange**, cardiac, endotoxic shock, R1078

**Sodium chloride**  
 appetite  
   angiotensin and (sheep), R690  
   hepatic contribution to, R1095  
 central hypertonic, pressor responses to, awake state (turkey), R258

dietary depletion, polydipsia induced by, neuroendocrine factors in, R1071

**Sodium cyanide**, chemoreflexive response to (longnose gar), R116

**Sodium nitroprusside**, arterial hypotension and (sheep), R18

**Soleus muscle**, amino acid transport, endotoxic shock effects, R150

**Solitary tract**  
 nucleus, area postrema lesions, R575  
 nucleus of, ACTH response, R106

**Somatostatin**, ion transport and, gill (flounder), R1064

**Spikes**, continuing, averaging of nerve activity, R700

**Starvation: see Fasting**

**Stenosis**, aortic, left ventricular pressure and, awake state, R23

**Stomach**, intragastric balloon, food intake and body weight relations, R794

**Streptozotocin**, diabetes, behavior and, R371

**Stress**  
 arterial hypotension, hormonal responses to (sheep), R18  
 behavioral, hemodynamic responses to, R82  
 environmental, kidney function during hypertension and, R289  
 hyperosmotic, glial blood-brain barrier (skate), R1186  
 osmotic, hexokinase activity and, forebrain, R268

**Stroke volume: see Volume**

**Subfornical organ**, electrical stimulation, plasma vasopressin concentration and, awake state, R425

**Sucrose**  
 feeding, insulin and metabolic efficiency, R1109  
 preference, opioid antagonist effects, R91

**Suprachiasmatic nucleus**, cholecystokinin-8, food intake suppression, R718

**Supraoptic nucleus**, norepinephrine depolarization, R569

**Swallowing**, fetal, amniotic fluid (sheep), R781

**Sympathetic afferents**  
 coronary artery occlusion and, R670  
 response to mechanical stimuli, reticular cell, R680

**Sympathetic nerves**, atriopeptin II, renal response to, R187

**Sympathetic nervous system**  
 activity, cerebral ischemic response, R295  
 blood pressure measurement and, R1009  
 encephalin secretion, adrenal, after hemorrhage, awake state, R341  
 hyperphagia, diet-induced obesity without, R433  
 hypoxemia effects, fetus (lamb), R893  
 vasopressin, activators of, R476  
 ventromedial hypothalamic lesion, pancreatic adaptation after, R63, R70

**System A**, amino acid transport, endotoxic shock effects, soleus muscle, R150

**T**

**Taste: see Gustatory response**

**Temperature**  
 ambient, thermoregulation (hamster), R320  
 oxygen binding and, blood (alligator), R901

regulation, cold-water immersion (penguin), R456  
 Temperature, body, colonic, thermoregulation (hamster), R320  
 Testosterone, decreased levels, brown fat changes and (hamster), R963  
 Thermogenesis  
   cold-water immersion (penguin), R456  
   diet and, brown fat mediation, neonate, R518  
   diet-induced  
     brown fat, R13  
       efferent discharges of brown adipose tissue nerves, R240  
   nonshivering  
     adrenalectomy and, R851  
     potassium-hydrogen antiport, brown fat mitochondria (hamster), R787  
   obesity, without hyperphagia, R433  
   VMH stimulation, sympathetic denervation effects, R1005  
 Thermoregulation  
   autonomic and behavioral relations (hamster), R320  
   diet and, brown fat mediation, neonate, R518  
   fur insulation, resting and exercise (reindeer), R32  
   heat loss responses, elevated cerebrospinal fluid osmolality and, R749  
   hypothalamic neuronal activities and, bombesin effects, R303  
 Thiophan, dopamine neurons and, ventral tegmental area, R243  
 Thirst: *see* Drinking  
 Tongue, epithelial responses, taste transduction, R598  
 Trace metals: *see* Metals  
 Treadmill: *see* Exercise  
 Trifluoperazine, renin secretion and, R531  
 Trigeminal system, ACTH release, caudolateral areas, R934  
 Trimethylamine-*N*-oxide, internal milieu and, protein function, R197  
*d*-Tubocurarine, voiding cycle, urinary bladder, R250  
 Tyrosine  
   dietary, behavior and, diabetes, R371  
   release, muscle, R165

**U**

Urea, protons and osmolytes, protein function and, R197  
 Ureagenesis, glutamine flow, renal regulation of, R859  
 Urethan, anesthesia, urinary bladder voiding cycle and, R250  
 Uric acid, degradation, cecal (quail), R59  
 Uriase, activity, cecal degradation (quail), R59  
 Urinary bladder  
   function  
     anesthetic effects, model, R1177  
     control of, female, R225  
     ionic compensation, chronic hypercapnia (turtle), R1228  
   muscle contractility, model (pig), R978  
   voiding cycle, urethan anesthesia and, R250

Urinary excretion, circadian rhythms, adrenalectomy and, R441  
 Urine, fetal, amniotic fluid (sheep), R781  
 Urodynamics, female, R225  
 Uterus, nonlabor contractions, cardiovascular responses, fetal (sheep), R409

**V**

Vagal tone, heart rate control, ontogeny of (bullfrog), R231  
 Vagotomy, hepatic, salt appetite satiation and, R1095  
 Vagus nerve  
   arterial pressure ramps, heart period and, R1086  
   function, area postrema lesions, R575  
   hepatic, gastric emptying of glucose, R609  
 Vanadium, metabolism, whole-body, model (sheep), R325  
 Vasodilation, bombesin effects, thermoregulation, R303  
 Vasomotor functions, spinal vasopressin and, R510  
 Vasopressin: *see also* Antidiuretic hormone arginine  
   A6 epithelia, R77  
   dehydration natriuresis, R560  
   urinary and metabolic clearance of, R365  
   arterial hypertension and, R614  
   cardiovascular responses, hemorrhage, fetus (sheep), R417  
   central system, activators of, R476  
   infusion, head-up tilt and, cardiovascular and endocrine responses, R735  
   neurohypophysis neurons, angiotensin effects, R712  
   passive head-up tilt and, R742  
   plasma concentration, subfornical organ, electrical stimulation effects, R425  
   pressor contributions from, after polyethylene glycol, R769  
   pressor resistance to, sodium and potassium depletion, R525  
   response, corticotropin-releasing factor and hyperosmolality, awake state, R1235  
   saline infusion and drinking effects, R1091  
   secretion  
     osmoregulation during high salt intake and, R878  
     volume influences on, dehydration (sheep), R621  
   spinal mechanisms, cardiovascular regulation, R510  
   transient fall, oral hypertonic saline and, R214  
 Vasotocin, release, angiotensin II stimulation of, awake state (chicken), R333  
 Ventilatory control, hypoxia, sodium cyanide and (longnose gar), R116  
 Ventral tegmental area, dopamine neurons in, endogenous enkephalin modulation of, R243  
 Ventricles: *see* Cerebral ventricles, Heart ventricles

Ventriculocisternal perfusion, closed, cerebrospinal fluid pressure and, R990  
 Ventromedial lesions, hypothalamic obesity, R1221  
 Visceral nerve, function, area postrema lesions, R575  
 VMH: *see* Hypothalamus, ventromedial  
 Voiding cycle, bladder, urethan anesthesia, R250

Volume  
   blood  
     continuous determination, awake state, R492  
     fetal, nonlabor uterine contractions (sheep), R409  
     prolonged hemorrhage and, fetus (sheep), R417  
   depletion, after polyethylene glycol, R769  
   expansion, atrial natriuretic factor release, R947  
   homeostasis, brown fat (hamster), R787  
   lung, oxygen and carbon dioxide content and, cutaneous gas exchange (frog), R941  
   plasma, water immersion and, awake state, R582  
   regulation, glial blood-brain barrier (skate), R1186  
   residual, urinary bladder voiding cycle, R250  
   stroke  
     hemorrhage and, awake state (rat, chicken), R846  
     obesity effects, R314  
     thirst and vasopressin secretion, dehydration and (sheep), R621

**W**

Water  
   atrial peptides and, R1091  
   deprivation  
     hexokinase activity and, forebrain, R268  
     sodium excretion during, R560  
     volume influences, dehydration and (sheep), R621  
   doubly labeled method, validation using a ruminant (caribou, reindeer), R143  
   evaporative loss, thermoregulation (hamster), R320  
   excretion, osmoregulation, high salt intake and, R878

**Weight**

body  
   food intake and, intragastric balloon effects, R794  
   glucagon and epinephrine effects, liver denervation and, R349  
   insulin and metabolic efficiency, R1109, R1118

Weightlessness, muscle and, R1059

**Z**

Zinc, metabolism, kinetics, R398  
 Zona incerta, osmotically induced drinking and, R823
